WAVE D Acoustic pendant with LED downlight

The wave is characterized by a fascinating mix of playfulness and seriousness. This makes it ideally suited to add a touch of lightness to areas with a more formal nature, such as offices and meeting rooms. This distinctive vertical lined texture of the Basotect padding provides character and also optimizes the acoustic properties. The units are available in several coordinated shades for visually engaging configurations.

Application

- Ceiling

Properties

- Sound Absorbing
- Lightweight
- High aesthetic value

Mounting

Installation is very easy as each unit is hung individually, with the height easily adjustable.

Cleaning

Can be dusted daily with vacuum cleaner.
